## SAMSUNG HVAC

DVM S2 is the latest generation of Samsung VRF systems, boasting industry leading efficiencies and low ambient heating performance. Artificial Intelligence for refrigerant monitoring and minimal de-frost time are industry firsts. DVM S2 systems are available in Heat Pump and Heat Recovery up to 40-Tons, with up to 20-Tons in a single module.

## ADDISON

DEDICATED OUTDOOR AIR SPECIALISTS

A leader in dedicated outside air solutions (DOAS), Addison delivers best in class solutions up to 140 tons for safer, healthier, and more productive indoor environments. Addison DOAS equipment can come in both rooftop and modular splits system designs.

[addison-hvac.com](http://addison-hvac.com)

## TEMPMASTER

TempMaster provides the full range of packaged rooftop units (RTUs) from 3 to 150 tons. All units are manufactured in JCI's Norman, Oklahoma state-of-the-art facility. Currently, NSC APG stocks these units up to 15 tons in St Louis (also in new Lenexa facility starting May 1st) for quick replacement opportunities.

## QUANTECH

Quantech (manufactured by JCI) water and air-cooled scroll chiller line is supported by NSC APG's knowledgeable engineering staff and qualified technical field support staff. Quantech focuses on strong delivery times matched with industry-leading efficiency and proven quality of performance.

## Delta

CONTROLS

The Delta Controls product family offers a wide range of control solutions that are cost-effective and scalable. With best-in-class wireless and cloud-hosted building automation systems, Delta Controls has the technology needed to meet even the most rapidly changing requirements.

## BOSCH

BOSCH Boilers are designed to deliver the highest quality, flexibility, and dependability in the industry. They offer a small footprint with Stand-alone capacities up to 1MMBTU. Modular systems can be cascaded up to an 8MMBTU system with 40:1 turn-down.

## BOSCH COMMERCIAL CHP

The Bosch water source heat pump (aka Florida Heat Pump) is a full line of high-quality commercial equipment for common water loop and geothermal applications. They are an ideal choice for all size projects due to their ability to fit in tight retrofit spaces and their capacity of 1/2 to 60 tons.

## Cultiva Systems

Cultiva provides dedicated indoor agriculture systems that are designed specifically for the indoor cannabis grow environment. Fully modulating cooling with fully condensing reheat provide the capability to handle the high variability of both latent and sensible loads that occur in the grow environment throughout the entire plant life cycle.

## SAMSUNG DVM CHILLER

Samsung's innovative DVM Heat Pump Chiller provides a chilled water solution that combined with the benefits of VRF technology: High Efficiency, Compact Size, Significant Turn-Down Capability, and reduced noise output. This Modular system is available in 10-Ton and 15-Ton modules, combinable up to a 240-Ton system.

## CAPTIVEAIR PARAGON

DEDICATED OUTDOOR AIR SYSTEM

The CaptiveAir Paragon DOAS system is built on 45 years of HVAC experience. These units offer exceptional energy savings and precise humidity control at an attractive first cost. The Paragon truly shines in the low to midrange CFM applications of 6 to 50 tons.

## Swegon

Swegon's flagship GOLD ERV is a complete air handling unit with a Total Energy Rotary Heat Exchanger and optional DX, Water, or Steam Coils. State of the art controls, patented wheel technology, and variable speed control of the wheel and direct-driven supply and extract fans produce dry bulb efficiencies up to 85% in airflows from 300-17,500 CFM.

## UNITED CoolAir

All-Indoor Solutions

United CoolAir has been providing indoor and ventilation HVAC products since 1988. Their unique AlphaAire packaged DOAS system is mounted indoors, Vertical or Horizontal. Ready to ship in 2 weeks, with no line sets, no field brazing, evacuating, or charging.
